

Teko Livestock Research Centre

- Produce improved breeds of chicken
- Produce cross breeds of improved breeds with the West African Dwarf Goat
- Establish epidemiology of Peste des Petits Ruminants (PPR) virus in small ruminants
- Characterization and Conservation of Forage Resources for Increasing Livestock Production
- Develop and disseminate protocols for the rearing of grasscutters and rabbits
- Develop an animal traction scheme

SLARI Head Office

- M&E system in research

Government of
Sierra Leone

Boosting Agriculture and Food Security (BAFS)

Funded by the
European Union

Support to Sierra Leone Agricultural Research Institute (SLARI): Enhancing Research Capacity and Practice

Kabala Horticulture Crops Research Centre

- Established protocols for seed multiplication of selected vegetable crops
- Introduce and propagate underutilised vegetable crops (onion, tomato, ginger, Irish potato, passion fruit)
- Identify vegetable pests and diseases and develop control measures
- Establish protocols for local and commercial production of mushrooms
- Develop improved vegetable cropping systems (Climate Change Adaptation techniques)

Kenema Tree Crops Research Centre

- Development of high yielding, disease tolerant cocoa varieties
- Propagate high-yield Robusta coffee and explore market potential of Liberica and Stenophylla coffee
- Development of high yielding, pest/ disease tolerant cashew varieties
- Identify viable agroforestry systems for cocoa/ coffee
- Propagation of grafted fruit trees, banana and plantain to meet farmers' and private sector demand
- Test cashew IVM at clonal gardens
