

Enhanced research capacity and practice

SLARI

M&E system in research

Kabala Horticulture Crops Research Centre

- 1- Screening, characterization and testing of new and/or underutilized crops
- 2- Characterisation and selection of best suitable varieties of vegetable crops
- 3- IPM of horticultural crops
- 4- Strengthening nutrient and food security through mushroom cultivation and marketing
- 5- Climate Change Adaptation techniques in horticultural. crops

Teko Livestock Research Centre

- 1- Poultry production and hatchery establishment
- 2- Small ruminant production and breed improvement
- 3- Epidemiology & identification of Peste des Petits Ruminants (PPR) virus in small ruminants
- 4- Enhancing small stock productivity for small holder farmers
- 5- Characterization and Conservation of Forage Resources for Increasing Livestock Production
- 6- The Role of Animal Traction Technology

Kenema Tree Crops Research Centre

- 1- Development of high yielding, disease tolerant cocoa varieties
- 2- High-yield Robusta Coffee propagation and market potential exploration of Liberica and Stenophylla
- 3- Development of high yielding, pest/ disease tolerant cashew varieties
- 4- Identify viable agroforestry systems for cocoa/ coffee
- 5- Sustainable Fruit Trees Production for Farmers in Sierra Leone
